

Primary Logo Lockup - "Stacked"

Primary Logo Lockup - "Horizontal"

Additional Colorways

Reverse - for use on black or other dark backgrounds.

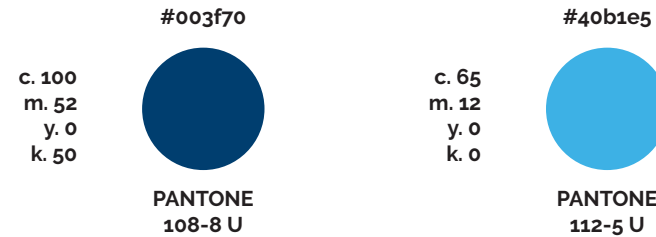

2-Color Spot (for print only)

1-Color Spot (for print only)

MultiValue Spot Colors

MultiValue - Logo Usage Restrictions:

The MultiValue brand is most powerful when one of the "Primary Lockups" is used. These are the preferred versions and colorways, use whenever possible. The Logo is also provided without a tagline and in simplified colorways. The logo should not appear in any other colors or formats.

The MultiValue brand is diluted if we are not consistent with logo usage. Logos should never be altered in shape, color, or proportion. Never add graphic elements, rearrange or separate the components. Do not add dimension or a drop shadow.
